

You are heading home tonight, and want to share what you have learned about the solar system with your family. You do not have any solar system models around, so you decided to make one using the materials available. For each body in the solar system, select one item as a representation of their size in relationship to each other. In the justification column, explain why you believe this particular item to be the best choice. (You are not building anything or bringing any items to school)

Solar System Body Item Justification

Earth		
Jupiter		
Mars		
Mercury		
Moon		
Neptune		
Saturn		
Sun		
Uranus		
Venus
